***Allowable Subject Matter***

1. Claims 1-8 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Applicants have amended the claims to correct the formalities in accordance to the office action dated 06/15/04. Upon further consideration, prior art of record, taking individually or collectively, fails to fairly teach method for determining an end of a transmitted frame including the claimed subject matter "delaying the low-pass filtered correlation signal to provide a delayed low-pass filtered correlation sequence signal; multiplying the delayed low-pass filtered correlation signal by a fixed predetermined threshold to provide a multiplied correlation signal; and comparing the multiplied correlation signal with the low-pass filtered correlation signal to provide a match/no match comparison indicative of the possible end of a transmitted frame" in independent claim 1 (claims 2-7 depend therefrom) and the claimed subject matter "delaying the low-pass filtered correlation signal to provide a delayed low-pass filtered correlation signal; multiplying the delayed low-pass filtered correlation signal by a fixed predetermined threshold by first computing  $10 \cdot \log_{10}(\cdot)$ , or an approximation of  $10 \cdot \log_{10}(\cdot)$ , of each low-pass filtered correlation signal operand to provide a plurality of low-pass filtered correlation signal log operands and then adding each of the plurality of low-pass filtered correlation signal log operands to provide a multiplied correlation signal; and comparing the multiplied correlation signal with the low-pass filtered correlation signal to provide a match/no match comparison indicative of the possible

end of a transmitted frame and performing a comparison a predetermined number of times before an end of a transmitted frame is determined" in independent claim 8.

Thus, claims 1-8 are found to be novel and unobvious over prior art of record.
